## Project Information

- **Project Title:** MyMediPal
- **Project Owner:** Allen Villarin
- **Scrum Master:** Jashan Sharma
- **UI/UX Designer:** Oyinkonsola Akinboye
- **Quality Assurance:** Manas Sharma
- **Development Team:** Allen Villarin, Jashan Sharma, Oyinkonsola Akinboye, Manas Sharma

## Introduction

- **1.1 Background**

Medical is envisioned as a pivotal solution in the realm of health technology, designed to address the critical issue of medication management. By offering an intuitive platform for tracking medication schedules, dosages, and refill times, MyMediPal seeks to mitigate the risks associated with non-adherence to prescribed treatments. Its development is driven by the goal of simplifying the daily routines of individuals requiring medication, thereby promoting better health outcomes and enhancing the quality of life for its users.

- **1.2 Objectives**

For the MediPal app, the objectives focus on improving medication adherence and patient health outcomes through a user-friendly platform. The primary goal is to ensure users reliably follow their medication schedules with timely reminders and easy management. Additionally, enhancing communication between patients and healthcare providers and simplifying the pharmacy refill process are key aims to support comprehensive medication management.

- **1.3 Scope**

The scope of MediPal is to revolutionize medication management through a mobile app that seamlessly blends user-centric design with advanced technology. It aims to support users, caregivers, and healthcare providers with intuitive

features for tracking medication schedules, reminders, and adherence, fostering a connected healthcare experience that prioritizes patient well-being and simplifies the medication management process.

## System Architecture

- **2.1 Overview**

The architecture of MediPal is designed to be modular and scalable, supporting the app's core functionalities while ensuring user data security and privacy. The architecture will facilitate seamless interaction between users, healthcare providers, and pharmacies, promoting efficient medication management.

### Rule engine

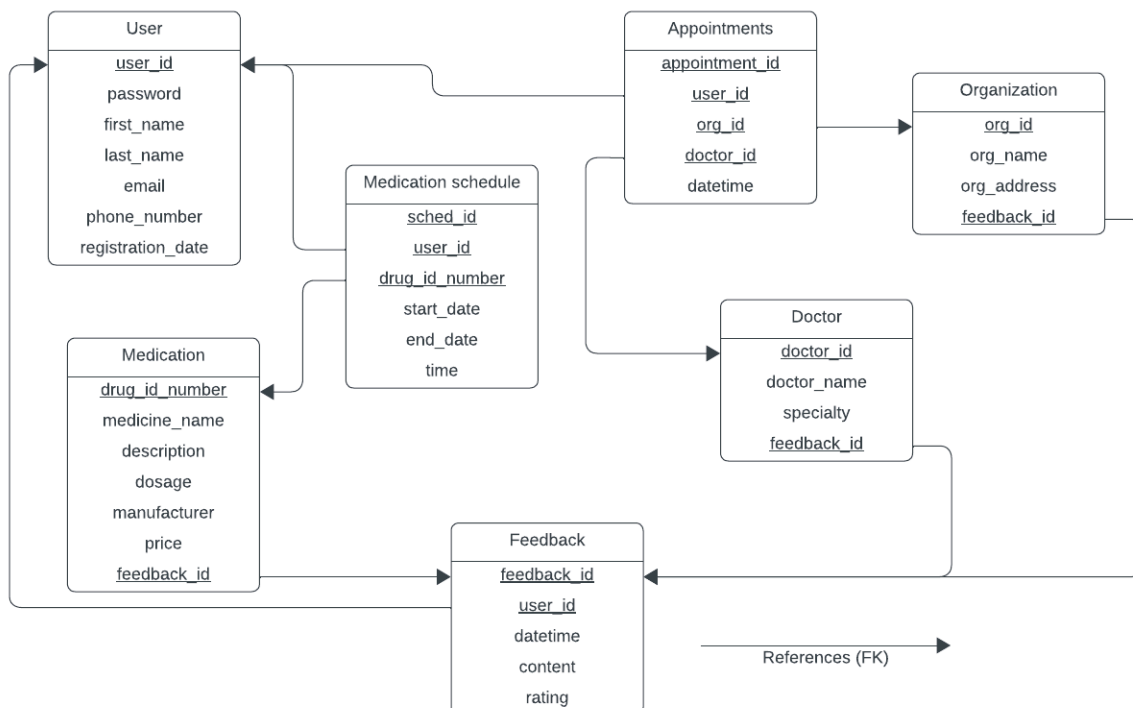

## ● 2.3 Components and Modules

MediPal's architecture is built around a client-server model, with a mobile application as the client and a backend server that handles data processing, storage, and communication with external systems like healthcare provider systems and pharmacy systems.

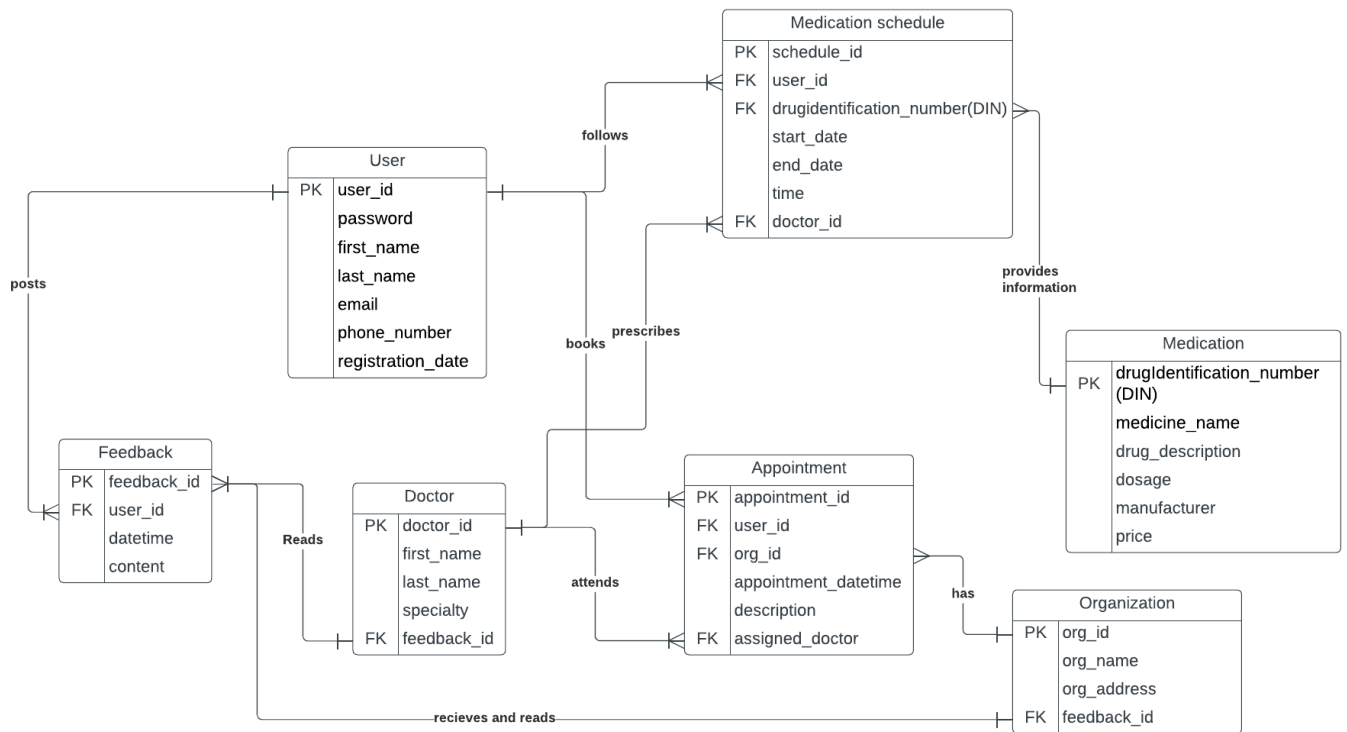

- **Client Application:** The mobile app, accessible by users, caregivers, and potentially healthcare providers, offers features like medication tracking, reminders, and communication tools.
- **Backend Server:** Responsible for processing requests from the app, managing user data, and medication schedules, and integrating with external APIs for pharmacy services and healthcare systems.
- **Database:** A secure database that stores user profiles, medication schedules, and historical adherence data, ensuring data integrity and privacy.
- **External APIs:** Integration with healthcare systems for accessing prescriptions and pharmacy systems for managing refills and notifications.

## Database Design

PRODUCT BACKLOG						
ID	As a... (Role)	I want to be able to... (Requirement)	So that...	Priority	Sprint	Status
1	Visitor	Sign up	So that I can have an account and start managing my medicine intake	MUST	1	DONE
2	User	Log in	I can start managing my medicine intake	MUST	1	DONE
3	User	View homepage	I can see a summary of today's medication	MUST	1	DONE
4	User	Search medicine	I can read medication details such as medication dosage	MUST	1	DONE
5	User	Search doctors	I can view doctor's profile and book a doctor's appointment	MUST	1	DONE
6	User	Search pharmacies	I know where I can buy my prescribed medications	MUST	1	DONE
7	User	Search clinics	I can book an appointment depending on what medical condition I have	MUST	1	DONE
8	User	Search hospitals	I will know which hospital is best to treat my medical condition	MUST	1	DONE
9	User	View my medication calendar	I can be more informed of what medication I am taking daily	MUST	2	DONE
10	User	Scan my medication	It will automatically add what medication and time I should take it	MUST	2	DONE
11	User / Visitor	View community page	I will be informed if there are news or advices in the medical community	MUST	2	DONE
12	User	View my profile	I can read and edit my details when needed such as emergency contacts	MUST	3	DONE
13	User	Choose a pharmacy	I can shop and pick up medicine easily	MUST	4	DONE
14	User	Get Support	I can navigate the app when I am lost	MUST	4	DONE
15	User	View my medical history	I will know what medication I have taken in the past	MUST	5	TO BE DONE
16	User	Place an order	I can refill my medication whenever I run out	MUST	5	TO BE DONE
17	User	Add a reminder	I can be reminded when I should take my medicine daily	MUST	5	TO BE DONE
18	User	Sign out	If I want to stop using the application	MUST	5	TO BE DONE
19	User	Edit an alarm	If I have a mistake, I can change it easily	MUST	5	TO BE DONE
20	Visitor	Create account	I will have an account to have full access of the application	MUST	5	TO BE DONE
21	User	Change Language	I can use that app in my desired language	SHOULD	5	TO BE DONE
22	User	Activate automatic medicine refill	I will not run out of medication if I forgot to order	MUST	5	TO BE DONE
23	User	Deactivate automatic medicine refill	I will not have any extra medicine after purchasing	MUST	5	TO BE DONE
24	User	View order history	I will know when and what I ordered previously	MUST	5	TO BE DONE
25	User	Contact health professionals	If I have a question about my medication, I can contact them	MUST	6	TO BE DONE
26	User	Change font size	I can properly read medication information	COULD	6	TO BE DONE
27	User	Change theme (Dark and light mode)	I can see details properly	COULD	6	TO BE DONE

## Sprint backlog

SPRINT BACKLOG			
SPRINT	WORK DONE	Status	Worked by
Sprint 1 (Jan. 14, 2024 - Jan. 27, 2024)			
1	Requirements gathering	Done	Allen, Oyinkonsola, Jashan, Manas
1	Create Product backlog	Done	Allen, Oyinkonsola, Jashan, Manas
Sprint 2 (Jan. 28, 2024 - Feb. 10, 2024)			
2	Create wireframes	Done	Allen, Oyinkonsola, Jashan, Manas
2	Test	Done	Allen, Oyinkonsola, Jashan, Manas
2	Retrospect	Done	Allen, Oyinkonsola, Jashan, Manas
Sprint 3 (Feb. 11, 2024 - Feb. 24, 2024)			
3	Develop mockups	Done	Oyinkonsola
3	Inspect mockups	Done	Allen, Oyinkonsola, Jashan, Manas
3	Test	Done	Allen, Oyinkonsola, Jashan, Manas
3	Retrospect	Done	Allen, Oyinkonsola, Jashan, Manas
Sprint 4 (Feb. 25, 2024 - Mar. 9, 2024)			
4	Design database	Done	Allen, Oyinkonsola, Jashan, Manas
4	Develop database	Done	Allen, Oyinkonsola, Jashan, Manas
4	Develop prototype	Done	Allen, Oyinkonsola, Jashan, Manas
4	Test	Done	Allen, Oyinkonsola, Jashan, Manas
4	Prepare MPR	Done	Allen, Oyinkonsola, Jashan, Manas
4	Prepare presentation	Done	Allen, Oyinkonsola, Jashan, Manas
4	Restrospect	TO BE DONE	Allen, Oyinkonsola, Jashan, Manas

## Conclusion

After this sprint, the team will now go forward in the planning phase for sprint 5. The team successfully delivered the major features required for the current phase of the application. Additional wireframes and mockups will be developed in the subsequent sprints, leading to the creation of the final prototype for the team's final deliverable.
